## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-13 and 15-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese reference #62-29610 in view of Japanese reference #4-7499. Japanese '610 discloses a canal including a plastic liner 1 fixed to the canal via fasteners 3, it is inherent that the canal has a length, a bottom and first and second side walls.

Japanese '610 does not disclose the at least one tab such that a head of a fastener is between the tab and the liner. Japanese '499 teaches that it is known to provide tabs (generally shown at 4a and 4b) on a waterproof sheet 1 wherein the head of a fastener 10 is between the tab and the liner and the sheets are capable of being heat sealed ie. fusion welded as shown in figures 1-3. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a tab on a waterproof sheet, as taught by Japanese '499 in order to facilitate fastening of a waterproof sheet and to ensure a "leak-proof" connection. Furthermore, depending upon the size of the canal, and the size of the waterproof sheets used, it would have been an obvious matter of design choice to provide first, second, and third tabs

positioned at the bottom, the first sidewall, and the second sidewall respectively, in order to line the entirety of the canal.

As to the method steps, it would have been an obvious matter of design choice to unroll a plastic liner in the step of placing, since it is known to roll sheets of material in order to facilitate storage and handling, therefore it would be inherent to unroll the sheets of material when needed.

### ***Allowable Subject Matter***

3. Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Japanese '411 and '718 disclose waterproof sheets used for liners. Ives and Rohe disclose lining of canals. Brady et al, Scuero, McCorkle et al, Sullivan, and Nienstadt disclose various lining systems for ditches.
